Ideal Large-Flowered Gladiolus

Gladiolus make attractive displays in the garden when planted in beds or in groups along the border, and they are ideal for cutting. Gladiolus are easily grown in any good, well-drained soil in a sunny location. They may be had in bloom continuously through the summer and fall months by planting a number of bulbs every week or so from early spring until July. Free from Thrips and other diseases.

The following are truly superb and proven varieties, which are extra fine in color and bear immense flowers, excellently placed on tall, upright spikes.

SELECTED VARIETIES. Large 1½" - 2" size bulbs.

GIANT-FLOWERED

Begonias

Imported from Belgium

Begonias are perhaps the handsomest of all summer-flowering plants. They are very popular for use in window boxes, as house plants, and for planting in beds or groups in moist, shaded areas. They thrive best in soil containing 50% leaf mold. Gigantic flowers appear uninterruptedly from July until frost.

Large 1½" - 2" Size Bulbs

DOUBLE CAMELLIA BEGONIAS

Brilliant, full double, giant flowers which resemble camellias.

Copper	White	Yellow
Scarlet	Salmon	Rose
	Mixed Colors	Crimson

Any of these colors, .30 ea.; 3 for .75; 10 for \$2.25.
25 for \$5.00.

Gloxinia

A beautiful house plant with handsome, bell-shaped flowers of the richest colors. They can be planted from February until late May for a succession of bloom. Place one bulb in a 5-inch pot filled with good rich sandy loam, water sparingly and place at once in a sunny window or conservatory. Can be transplanted to a sheltered place in the garden. Careful watering and good drainage are essential.

Large 1½" - 2" Size Bulbs

Finest Mixed Colors.

Plant GLADIOLA for Summer Bloom.

Lilies-Summer and Autumn Flowering Varieties

Select Varieties, Large 8-9 inch Bulbs

Lilies do best in the hardy border or among shrubbery. They love to have their "heads in the sun and feet in the shade"—so provide a location where the base of the plant will be somewhat shaded. Once established, Lilies increase in beauty year after year.

These are ideally suited for the border because of their hardiness and prolific blooming qualities. Will make your garden scene bright and gay in summer and fall.

HENRYI. Orange. A beautiful lily from China. Blooms in August. 3 for \$1.30; 10 for \$3.75.

IMPROVED REGALE. White flowers slightly yellow in throat. 3 for \$1.15; 10 for \$3.25.

ORANGE TRIUMPH. Brilliant orange. 3 for \$1.10; 10 for \$3.00.

SPECIOSUM RUBRUM. Frosted white, suffused rose-pink and spotted crimson. 3 for \$1.70; 10 for \$5.00.

FIGRINUM SPLENDENS. Salmon-orange with purplish-black spots. 3 for \$1.10; 10 for \$3.00.

FANCY-LEAVED

Caladiums

Large 1½" - 2½" Bulbs

Showy foliage plants with variegated leaves. Marvelous pot plants that do well in shady window boxes or in outdoor beds in semi-shady positions. They are easy to grow, and nothing gives such a beautiful variety of color as these Caladiums. All through the summer and fall their magnificently colored leaves are most decorative in the garden when planted in groups. If cut and put in bowls or vases, the leaves make most effective and attractive table decorations.

Best if started in pots, one bulb to a 6-inch pot.

EXTRA CHOICE MIXTURE. 1½"-2½" diameter. 3 for \$1.00; 10 for \$3.00; 25 for \$7.00, Prepaid

ORDER EARLY. Don't delay! Send your order today and be confident of receiving the finest Roses in America.

CULTURE OF ROSES FOR BEST RESULTS

Roses prefer a good garden loam with a plentiful supply of organic matter incorporated. Soils of this nature retain moisture well and roses like plenty of moisture but resent wet feet. Provide for drainage if the rose bed is located where water does not drain readily.

If soil is hard or drainage poor dig out the rose bed to a depth of 2 feet and fill the bed with a few inches of stone in the bottom for drainage and cover the stones with fertile soil incorporated with Peat Moss, well Rotted Stable Manure or Dehydrated Manure. We recommend 70% fertile soil, 10% Peat Moss, 20% rotted manure. If dehydrated manure is used, reduce the amount of this to 5%. Where drainage is good, stone in the bottom is not necessary.

Complete all-purpose Rose Spray. Offers the first definite mildew and black spot control. Combining an insecticide it kills all insects, including sucking and leaf-eating types.

HARDY CHRYSANTHEMUMS

LOVELY HARDY CHRYSANTHEMUMS KNOWN AS HARDY GARDEN MUMS

No perennial has increased in popularity as rapidly as has the "Hardy Garden Mums" producing as they do, hundreds of brilliant blooms at so little a cost. They crown the Fall flower season, and your summer gardening efforts go out in a blaze of glory.

CULTURE

They thrive in any good garden soil and need little care other than guarding against insects, and applying a straw mulch in the late Fall for winter protection. To grow nice stocky plants, pinch the terminal shoots once or twice during the season to keep the plants sturdy and bushy. First pinching when the plant is 6 inches tall to induce lateral branches. When the lateral branches are 8 inches high, their tips may be pinched out again to produce more branches. Discontinue pinching by July 15th. The very early blooming varieties should not be pinched after July 10th. A well pinched or topped plant will grow strong and sturdy needing no staking and bloom abundantly. Avoid planting them in a shady location.

Strong plants from pots ready for delivery May 1st through June.

On order for \$5.00 or more, postage prepaid. Orders for less than \$5.00, please add 35c for packing and postage.

MAJOR BOWES

Large Early Flowering Chrysanthemums

Garden and Greenhouse Large-Flowering Type.

Each year we have more requests for the large greenhouse type chrysanthemums. These are not as hardy as the garden type mums but can be carried over winter very successfully in a cold frame under glass. To produce those big 5-6 inch blooms they require disbudding, leaving one to three flowers to each plant.

We offer only the choicest early varieties:

	Blooming Date to Frost
Hilda H. Bergen. Bronze.	
Major Bowes. Deep lavender-pink.	Oct. 20
Mrs. H. E. Kidder. Deep lemon-yellow, incurved.	Oct. 15

For the Finest Quality Lawn

Sow

Barr's

Quality Lawn Seed

Barr's Lawn Grass Seed Mixtures have been designed primarily to produce a lawn that is at once permanent, quick starting, and a good green color. They are guaranteed to be entirely free of Fall or Crab Grass seed. Recleaned by modern machinery, Barr's Lawn Grass Seed Mixtures are free from chaff, which makes these mixtures go twice as far. They test especially high in germination, providing a thick stand from the beginning which is essential in holding weeds in check.

One pound of seed will sow to 200 square feet of lawn. Keep ground constantly moist until grass is well started then water heavily at intervals during dry periods.

BARR'S SUNNYSIDE Finest Lawn Seed Mixture

This is a combination of the most desirable permanent grasses—dwarf, close-growing, fine-leaved—producing a good green lawn even in dry weather. As the chief ingredient of a good lawn is superfine Kentucky Blue Grass there is a large proportion of this ideal grass in this mixture. No Timothy nor Rye nor coarse-bladed annual grasses are used to cheapen this mixture. It will germinate quickly and provide a neat, permanent lawn. Besides the Kentucky Blue Grass other varieties included are fine leaved perennial grasses and some Chewing's Fescue, a higher-priced grass that holds weeds in check much better than other varieties.

1 lb., \$1.50; 5 lbs., \$7.00; 10 lbs., \$13.50;
25 lbs., \$31.25; 100 lbs., \$120.00 Prepaid.

BARR'S FANCY WHITE

Dutch Clover

Fancy recleaned seed. Excellent for lawns. Mix 2 to 4 ounces with each pound of above named mixtures if you want Clover on the lawn.

¼ lb., 60c; ½ lb., 90c; 1 lb. \$1.60.

BARR'S GREEN MANTLE Lawn Seed Mixture

This is a splendid mixture of good grasses for average conditions of soil and sunshine. It has a large proportion of Kentucky Blue Grass; also other desirable grasses for a good, quick effect which helps to hold weeds in check. Will give the lawn an enduring velvety, deep green mantle. Very free from weed seeds.

1 lb., \$1.25; 5 lbs., \$5.75; 10 lbs., \$11.00; 25 lbs., \$26.00; 100 lbs., \$95.00 Prepaid.

BARR'S FINEST SHADY SIDE Lawn Seed Mixture

Composed of shade-loving permanent varieties of fine-leaved grasses—no Timothy nor Ryegrass. Included are fine-leaved perennial grasses, which have proved best adapted for situations of a difficult nature due to shade.

1 lb., \$1.45; 5 lbs., \$6.75; 10 lbs., \$13.00; 25 lbs., \$30.00; 100 lbs., \$115.00 Prepaid.

Feed lawns under trees heavily two times a year—spring and early fall. Failure under trees is due more to competition of tree roots than shade. Special Lawn Fertilizer. See page 33.

Ephrata, Pa.

I just wish you could see the setting of Evergreens you planted. It looks wonderful. I don't think you could buy same for \$1,000. I am a good booster for Barr's Nurseries.

PFITZER JUNIPER

SPRUCES

Spruces are valued especially for specimen planting either singly, or in groups on large lawns; too large growing for foundation planting. These magnificent trees do best in suburban sections. The stately, regular, pyramidal outline of these hardy trees is strikingly effective.

YOU GET BEAUTY AND VIGOR IN "WILL GROW" EVERGREENS

Barr's "Will Grow" Evergreens have a character all their own, due to our system of shaping, root-pruning and frequent transplanting, which results not only in a close, beautiful, compact growth so desirable in Evergreens, but aids in a quick recovery after transplanting.

Being hand-dug B-B (Balled & Burlapped) when your order is received all roots are carefully secured. Taken fresh from the ground is assurance that your Evergreens will have their full vitality and that you can count on them giving you the most satisfactory results.

WHITE PINE

YEW S (Taxus)

IMMUNE TO MOST INSECTS AND DISEASE

Adaptability to part shade, semi-dwarf habit, handsome, dark green foliage winter and summer, give the Yews their high value as Evergreens for foundation and other ornamental planting. Best evergreen family for difficult city conditions and foundation planting. Any planting can be greatly enriched by a liberal use of Yews. Many of the Yews produce a profusion of red berries during the Fall.

When Building A New Home

It is advisable to budget 5 to 10 percent for landscaping. Real estate men agree an investment of 5 percent of the cost of the house in Evergreens, Trees, and Shrubs increases the value at least 15 percent and your enjoyment of your home to an immeasurable extent for many years to come.

At the very beginning of operations put aside the amount you propose spending for landscaping. Without good landscaping a house gives the appearance of "something wanting," or not being finished.

We shall be pleased to furnish estimates and sketches on contemplated plantings without cost. Our 62 years experience is yours for the asking.

When and How to Plant Evergreens

① Pack loose soil around ball Tramp firmly.
② Cut Burlap and push it down. Leave it to decay.

③ Then water and fill in remaining soil.
Dig hole 6 inches larger and deeper than ball of earth.

Evergreens transplant best during the Spring months, before and just as new growth is beginning, or for several months following August 15 when the new growth is completed and has become sufficiently hardened.

The excavation for planting should be considerably larger and deeper than the encased roots so as to allow liberal space around the ball for filling in with rich soil. Do not remove burlap, only loosen it at top and roll back as indicated in illustration. Carefully pack soil under earth ball. Mix 10% Peat Moss or rotted manure in the soil used for back fill, and ½ lb. Vigoro, or BARR'S special fertilizer to a wheelbarrow load of soil. When hole is two-thirds refilled, FLOOD WITH WATER.

In restoring the remainder of the excavated soil allow a shallow basin to remain around the tree to collect the rain and enable it to soak into the ground. Mulch with well-rotted manure or Peat Moss to conserve the moisture in the ground and keep it from becoming hard. In the Fall mound the soil against the plants.

Nightly spray the foliage, water soil weekly and direct a STRONG force of water against the under side of the foliage, when the sun is not shining. This treatment preserves the vigor and beauty of the plant.

SHADE AND FLOWERING TREES

Figures following names indicate approximate height at maturity. "CAL." means thickness of trunk 10 inches from ground. All trees are dug bare rooted, unless noted "B&B", roots are packed in wet moss. Figures following names or description refers to ultimate height.

How to Plant and Prune Ornamental Shrubs

Before Pruning

After Pruning

Remove about one-third of top growth of shrub at planting time if Spring planted, or following Spring, if Fall planted, to facilitate establishment of plant. Thereafter, pruning should be done to remove old wood and keep plant to size desired. Cut off damaged or frayed roots just above the point affected. Be careful to have roots exposed to air or sun as little as possible at any time.

The important point in planting is to have the hole large enough to accommodate the roots without crowding, and to get the soil well worked in among the roots. Space the larger growing Shrubs 5-6 ft. apart, medium growers 4 ft., low growers, 3 ft.

Always water abundantly and apply a mulch. A basin-shaped depression should remain around each plant to hold the water, at least the first summer.
